

**D**eepak is responsible for creating masterpieces with an emotional impact on people and can change the way we perceive cities and countries. Farsighted architects like Deepak, were and will continue to be, the masters in re-designing our future.

The role architecture plays in our everyday lives is astronomical. From the cool houses we marvel at various places to historical & iconic buildings that we recognize instantly, architecture surrounds us daily.

There is no mistaking Deepak's works, as they are the most distinctive, and innovative architectural phenomena around. His deconstructive forms are iconic as people flock to all of his buildings to marvel at the architectural forms he creates. Anil Sharma, CMD of Amrapali Group says, "He is among the most important architect of our age", adding, "he has set the precedence for contemporary architecture. His ability to create spaces that manipulate forms and surfaces is his most notable feats and we all love his unique uses of materials that almost defy all logic in how they work together."

What is a real architect? "I feel that a real architect has the ability to produce functional working drawings that are actually buildable, with consideration for the buildings mechanical, electrical and plumbing systems. Most of what we are seeing today is what I would call "Whole Building Decorators". They are basically designers posing as architects who have very little knowledge of what it takes to make it all work," says Deepak Mehta.

Talking about the body of work of Deepak Mehta, Prashant Tiwari, CMD of Prateek Group, says that he is a great man as he masters the details without losing sight of the big picture, and master the general idea without overlooking the details. The best thing about Deepak is that he is a great team man and he can work with different people at one time. This is not a small thing. To gauge the kind and varied work he has so far done, you can see the list somewhere in this story.

What makes a great architect? Deepak says that the traditional answer to that question in any artist of any sort is one who changes history with his craft, and, to a degree, that is true of architecture. "I would say the great architect is the architect who changes the course of people's lives who use their buildings, and to me, the best buildings are those that really deeply affect the lives of those people

**We respect time by making the full use of it. Almost all of the projects taken up by our organization are completed well within the time framework as agreed upon between us and our clients.**

who use them," he concludes. Deepak strongly believes that if you want to excel in architecture field, then you need a good and committed team to work. "I am happy that Deepak Mehta Associates (DMA) is a professionally managed organization that specializes in Housing and Town Planning projects. Our designs are the outcome of a careful thought process keeping in view the land parameters, its locations and the client requirement. We conceptualize the projects keeping in view the practical merits, feasibility and economics. Our projects reflect clear segregation and optimum integration of interior and exterior spaces and we put utmost emphasis on sustainable and environment friendly designing," says Deepak with sense of pride.

And in DMA, nothing is more precious than 'Time'. According to Deepak, "We respect time by making the full use of it. Almost all of the projects taken up by our organization are completed well within the time framework as agreed upon between us and our clients. We don't believe in deadline cliché, our commitment with the clients are our main source of motivation resulting in long term and repeated association with them. We have a strong infrastructure and skilled professionals to see through all the major and minor projects with ease. Our network with various resource persons across NCR and other parts of India makes us a extremely capable of developing exemplary projects." Deepak adds that in his very eventful journey, he would not have achieved but for the active help of various professionals and companies. They were and will remain part of his journey. In this connection, he talks about

SWATI STRUCTURE SOLUTIONS PVT. LTD. Specializes in the field of structural design analysis for both reinforced cement concrete and steel structure. Also the firm undertakes designs of bridges, flyovers, interchanges and expressways. They also carry out technical and financial feasibility of infrastructure projects.

According to Deepak, CONSUMMATE ENGINEERING SERVICES PRIVATE LIMITED takes care of the services part i.e. providing detailed engineering services for electrical, plumbing and fire fighting works. The plumbing works includes design and detailing of water supply, sewerage, storm water, solar water and other related details. The fire fighting works includes detailed engineering of fire fighting designed as per NBC 2005 including detailing of pump rooms etc. The electrical works include designing from a single point in a room to the detailing of electrical sub-station and panel rooms. Deepak Mehta is also all praise of professionals of
